

Ok, Thomas Freed here for the Tax-Freedom.com, IRSzoom.com, and the LibertyWorks Radio Network.com websites with a **5-Point Plan** for DOGE to **reduce** the federal government, **both in** size and spending, in order to **SAVE** the Country, the Republic, our Freedom, the Currency; and the Constitution, and Free the American people from **direct** taxation in order to **SAVE** our Future; to distribute power & money to the 50 states to terminate the central planning to **SAVE** the Republic; and to logically reduce the reckless entitlement spending to **SAVE** the American currency. So, here's what the **DOGE Plan** should be to **SAVE** the Constitution. Everyone who sees & likes this should **POST** it on "X" to **@DOGE**.

1.) To REDUCE Federal OPERATIONAL SPENDING TO SAVE the COUNTRY

Cut the federal budget across the board 5% every year until the budget is balanced.

Eliminate the **Departments** of Agriculture, Energy, Education, Commerce, Labor, HHS, HUD, Transportation, EPA, OSHA

These "**things**" are **NOT** in the U.S. Constitution => **NOT** a federal matter => they **belong to the States**.

These became federal departments precisely because there is **no** money for the States to administer to these areas

The States **don't** have the unlimited access to printed "notes" that the Federal gov't does, so these all became constitutionally unauthorized federal operations. Now we should abolish them all and make them all small "offices" in the Department of the Interior to coordinate efforts, and the sharing of information, between states while providing information to Congress about the State programs being implemented.

2.) To REDUCE FEDERAL BUREAUCRATIC POWER and SELF-ENRICHMENT of the D.C. politicians, federal employes, gov't contractors, and the surrounding DC area (3 of the wealthiest counties in America) TO SAVE the REPUBLIC

We must **break** the federal **monopoly** on *power* and **money**. To do so, we should **Distribute the funds** for those eliminated agencies **to the States**, cut by another 5%, to administer **IN EACH STATE** to the Agricult., Energy, Education, Commerce, Labor, Health, Housing, Transportation, Environment, & Occupational Safety **NEEDS, of THAT STATE** - as **decided by their own legislatures**, **NOT** central planners in DC. Thus **creating DISTRIBUTIVE** spending out of every State Capital, **NOT** just out of, in, and around Washington, D.C. Give the States the ability to manage their own affairs **without imposing** oppressive taxation on the people or businesses (of the State) to do it, by providing federal funds for the States to do it all themselves under a balanced federal budget that includes money for the States to use in each of these areas.

Then **continue cutting** those distributed State budget funds **by 10% every year** until the budget is balanced.

NO MORE CENRAL PLANNING AND CONROL OVER these State legislative & territorial ARENAS.

DISTRIBUTED POWER & FUNDS To SAVE the REPUBLIC

3.) To RESTORE FREEDOM & LIBERTY to *We the AMERICAN People* TO SAVE OUR FUTURE & FREEDOM

No more direct taxation of the American People, their labor, and or their properties and assets (rent, interest, dividends, salary, wages, commissions, tips, etc. are not federally taxable sources of “income” when earned by citizens in the fifty states)

TERMINATE the federal income tax. **BOTH** personal & corporate. It doesn’t work. It destroys the motivation to work harder and earn more money, while allowing the corporations to nearly entirely escape taxation by exaggerating their expenses to reduce profit (“*income*”).

Abolish the IRS → **REPLACED** it with a CRS = Corporate Revenue Service – **no confusion there** about who is taxed and who is **NOT**. Then impose a **5% tax** on **ALL corporate** earnings, - to be paid-in to the U.S. Treasury every **month**, with **NO** deductions at all for expenses allowed. Just a **FLAT 5%** of all; revenues, from all over the planet, every month, on **every American** company and on foreign companies revenues resultant from their operations in America.

4.) To REDUCE FEDERAL ENTITLEMENT SPENDING TO SAVE the CURRENCY

MEANS TEST Social Security & MEDICARE RECIPIENTS.

No payments to anyone with a net worth of over \$500k (- \$750K ?). **MEANS TEST !**

The **wealthy** should **SPEND THEIR OWN MONEY**, (or mostly their own money, **until...**)
And **not** get ours simply because they are 64 => **to buy their vote**.

Graduated payments as net worth falls below \$500k.

Pay the poor more (enough). Don’t pay the rich at all (**to buy their vote**).

5.) AMEND the CONSTITUTION to ALLOW, and to FUND, an AIR FORCE TO SAVE OUR CONSTITUTION

By **PROVING** that Congress and the States **ARE CAPABLE** of acting **to AMEND** the Constitution to **ALLOW** the federal government to **DO**, and to **FUND**, activities that it is necessary and proper for the central government to do! **LIKE HAVE** and perpetually **MAINTAIN** an Air Force, like the Navy, in order to be able to **DEFEND** the **NATION** and its **PEOPLE** when necessary. Which to accomplish, it has been **ABSOLUTELY NECESSARY** to have an **AIR FORCE** (to do it), since 1920 !
