This short book cuts through all the confusion about the income tax laws, because in reality there is no confusion in the law, and cuts through the maze of legal distractions asserted by the United States government to mislead the American people about the income tax, to quickly and absolutely demonstrate the proper application of the income tax under today's laws, and to clearly and succinctly show how the government has unlawfully misused and misapplied the provisions of the statutes to wrongfully force all American citizens and corporations to pay an income tax that they do not actually owe under the law, and which in fact, has clearly never actually been imposed by the law on their income derived from activities conducted in America.

Under the true scheme and actual letter of the laws enacted by Congress, non-resident aliens and foreign corporations are the actual taxpayers and only subjects of the income tax. American citizens and corporations are cast in the role of the sovereign, as tax collector, and are **not** cast in the role of the subject taxpayer; and American citizens are not subject to the payment of an income tax on income derived from their domestic activities, nor are they required by law to file a Form 1040 for the purpose of paying income tax.
